SOURCE INFORMATION:

Notes for all counties:

- Precinct designations/codes (OR_LAKE_01 for example) are my own creation. In each precinct, "OR" stands for Oregon. The second portion, such as "LAKE", stands for the county. The suffix number is the official number of the given precinct. When creating the statewide precinct file, I combined the three because otherwise there are numerous Precinct 1s and 2s and so on in various counties.
- Note that precinct boundaries can change often in jurisdictions throughout the country and that historic boundaries are typically difficult to find. As such, even though the precinct totals match the county totals here, some precinct boundaries may have changed between the election and the time I collected them. For the most recent/current versions, contact your local elections office or county clerk.

- Precinct boundaries digitized based on PDF from http://www.co.gilliam.or.us/county_election_results.html#VoterPrecincts; precinct-level results from same site; retrieved 12/27/2016

Grant County, OR

- Precinct boundaries are unofficial. Shapefiles compiled using school district boundaries from <http://spatialdata.oregonexplorer.info/geoportal/catalog/main/home.page;jsessionid=3B329471D63D1F5CEDE63CE67D88A2AE.liboeapp1>; retrieved 2/12/2017
 - Precinct numbers on Oregon's Secretary of State website match the ID numbers of school districts operating in Grant County, and the count of precincts matches the count of school districts. Given that school district lines often form precinct boundaries, for the purposes of this project it is assumed the school districts' boundaries here are identical to the county's voting precincts.

Lake County, OR

- Precinct boundaries included here are unofficial. They are based on a combination of sources: voter data obtained by Portland State University's Population Research Center in 2015; taxlot/parcel data obtained by Portland State University's Population Research Center in 2015 and 2016; tax code boundaries available online at <http://lcmaps.lanecounty.org/LaneCountyMaps/LakeCountyApp/index.html> and retrieved in June 2018; and lines from the Public Land Survey System retrieved in June 2018. To my knowledge no official map of Lake County's precincts exists, and the County uses a different system to determine a voter's precinct.

Wheeler County, OR

- Precinct boundaries are unofficial. Shapefiles compiled using school district boundaries from <http://spatialdata.oregonexplorer.info/geoportal/details?id=93ca242836cc46eb8c83f46612bb3d09>; retrieved 6/19/2018. Also helpful was the webmap available at <https://decisiondeskhq.com/data-dives/creating-a-national-precinct-map/>; retrieved June 2018.
 - Given that school district lines often form precinct boundaries, for the purposes of this project it is assumed the school districts' boundaries here are close to the county's voting precincts. Some adjustments were made; Dayville School District in Grant County includes an area along US-26. This section was assigned to the Mitchell precinct as US-26 leads to it, and the other two Wheeler County precincts (Fossil and Spray) are less accessible this area.
 - In 2016, the Oregon Secretary of State reported precinct results using the numbers 1, 3, and 4. As of 2018, they use the precinct names instead (Fossil, Mitchell, and Spray) but don't specify their numbers.

- The Fossil School District area closely aligns with the Fossil-based precinct in the Decision Desk map linked to above; it also consistently has a higher vote count than the other two and matches the vote counts in the Decision Desk map, suggesting Precinct 1 does indeed correspond to Fossil.
- Precincts 3 and 4 (Mitchell and Spray) have similar vote counts to each other and are combined into a single precinct in the Decision Desk map. In the 2016 general election Precinct 4 had more votes than 3. Spray had more votes than Mitchell in the 2018 primary, suggesting 3 corresponds to Mitchell and 4 to Spray. In the 2016 general election, Precinct 4 was more conservative than 3. In the 2018 primary, Spray had a higher proportion of its voters participate in the Republican than the Democratic primary compared to Mitchell, also suggesting 3 = Mitchell and 4 = Spray. Mitchell also comes before Spray alphabetically; since Fossil comes before both and is also Precinct 1, this increases the likelihood 3 and 4 are Mitchell and Spray, respectively.
- Precinct-level results from <http://results.oregonvotes.gov/ResultsSW.aspx?type=CTYALL&cty=18&map=CTY>; retrieved 1/2/2017

Yamhill County, OR

- Precinct boundary shapefiles provided by Liza Morehead at the Portland Institute of Metropolitan Studies (<https://www.pdx.edu/ims/>) on 1/10/2017
- Precinct-level results from <http://www.co.yamhill.or.us/sites/default/files/election-results/nov2016/canvass.pdf>; retrieved 1/2/2017

Other Useful Files

- http://navigator.state.or.us/ArcGIS/rest/services/Framework/Cadastral_PLSS/MapServer
 - State of Oregon PLSS map overlay; useful when digitizing precinct boundaries in Oregon; last accessed 2/18/2017
- Precinct results are not available for all contests in every county. For counties without these results, maps use the countywide boundary as a placeholder instead. The countywide boundaries are from the Census Bureau's files at <https://www.census.gov/geo/maps-data/data/tiger-line.html>; retrieved 2/12/2017.

FILE NOTES:

- Data from this project is provided in these formats:
- **Excel (.xlsx)**
 - Excel spreadsheets contain the election results by precinct. The "Precinct" field should be used when joining this to spatial data such as shapefiles.

- **Google Earth (.kmz)**
 - The .kmz files include both the precinct boundaries and election results.
 - Precinct boundaries in the .kmz files are simplified versions of the shapefile boundaries. Using the ArcGIS Simplify Polygon tool, boundaries were simplified to a tolerance of 100 feet with the retain critical points option. This substantially cuts down on file size and load time within Google Earth while maintaining an acceptable level of detail.
 - In the map files, red signifies precincts won by the Republican candidate, blue by the Democratic candidate, and yellow by candidates of other parties. Darker shades indicate larger margins of victory while lighter shades indicate precincts where the contest was closer.
- **GeoJSON (.json)**
 - The .json files include both the precinct boundaries and election results.
 - Precinct boundaries in the .json files are simplified versions of the shapefile boundaries. Using the ArcGIS Simplify Polygon tool, boundaries were simplified to a tolerance of 100 feet with the retain critical points option. This substantially cuts down on file size while maintaining an acceptable level of detail.
 - These files are formatted to the PJSON specification and are in the GeoJSON format.
- **Shapefile**
 - The shapefiles only include the precinct boundaries and do not include the election data. The “PRECINCTKR” field can be used to join the election results to the shapefiles.

FIELDS:

Election data points include the following:

- **State**
 - Name of the state.
- **County**
 - Name of the county.
- **Precinct**
 - ID of the precinct. In Oregon’s case, these are the identifiers I created to join the results data to the spatial data.
- **Precinct Name**
 - Some counties in Oregon name their precincts. Where applicable, the name is shown.
- **Contest**
 - Which contest the results apply to (President; Senate; etc.).
- **Statewide Result**
 - First and second place finishers for the state total. In Oregon this is 50 D – 39 R, meaning Hillary Clinton (Democrat) received 50% of the statewide vote and Donald Trump (Republican) received 39%.

- In these results R stands for Republican, D for Democrat, L for Libertarian, G for Green, and O for Other.
- County Result
 - First and second place finishers for the county total. In Marion County for example, this is 46 R – 42 D, meaning Donald Trump (Republican) received 46% of the countywide vote and Hillary Clinton (Democrat) received 42%.
 - In these results R stands for Republican, D for Democrat, L for Libertarian, G for Green, and O for Other.
- Precinct Result
 - First and second place finishers for the precinct total. For example, a precinct with 60 R – 35 D would mean Donald Trump (Republican) received 60% of the countywide vote and Hillary Clinton (Democrat) received 35%.
 - In these results R stands for Republican, D for Democrat, L for Libertarian, G for Green, and O for Other.
- Win Margin
 - How much the precinct winner won the precinct by. +40% would mean the winner won the precinct by 40 percentage points. For example, if the winner received 70% of the vote and the second place finisher received 30%, the win margin is +40% (70 – 30 = 40).
- Candidate or Party %
 - Percentage of the vote received by the candidate or party indicated in the field name. Official parties in Oregon include the Constitution Party (C), Democratic Party (D), Green Party (G), Independent Party (I), Progressive Party (P), Republican Party (R), and Working Families Party (W). Oregon allows candidates to be nominated by multiple parties and also allows write-ins (shown in the Other category in this data).
- Total Votes
 - Total number of votes cast for this contest in this location.
- Candidate or Party Votes
 - Number of votes received by the candidate or party indicated in the field name. Official parties in Oregon include the Constitution Party (C), Democratic Party (D), Green Party (G), Independent Party (I), Progressive Party (P), Republican Party (R), and Working Families Party (W). Oregon allows candidates to be nominated by multiple parties and also allows write-ins (shown in the Other category in this data).
- Notes
 - In some cases, this field includes additional information about a given precinct and/or contest.
